Two comments:

(1) The paper is currently under review with a different journal. I wanted to submit this paper at Synthese as well in order to meet the deadline for the Special Issue: Symmetries and Asymmetries in Physics -- otherwise I would have waited for a decision from the other journal.

(2) The paper appears to be long (81 pages). However, half of the space is devoted to diagrams, math expressions, and the bibliography. Without those, the text of the paper is a more conventional size at approximately 40 double-spaced pages (about 8500 words).
